Theoretical background. The acid dissociation constant for an acid is a direct consequence of the underlying thermodynamics of the dissociation reaction; the pK a value is directly proportional to the standard Gibbs free energy change for the reaction. The value of the pK a changes with temperature and can be understood qualitatively based on Le Châtelier's principle: when the reaction is ...

Los compuestos de sodio se conocen desde la antigüedad; sal (cloruro de sodio) ha sido un producto importante en las actividades humanas, por ejemplo la palabra salario, en referencia a Salarium, el dinero pagado a los soldados romanos para la compra de sal. [1] Si bien la potasa se ha usado desde la antigüedad, no se entendió que la mayor parte de su historia fuera una sustancia ...
